COMPANY PROFILE

Waterproofing

Sealant/Adhesive

REDI-MIX G&M

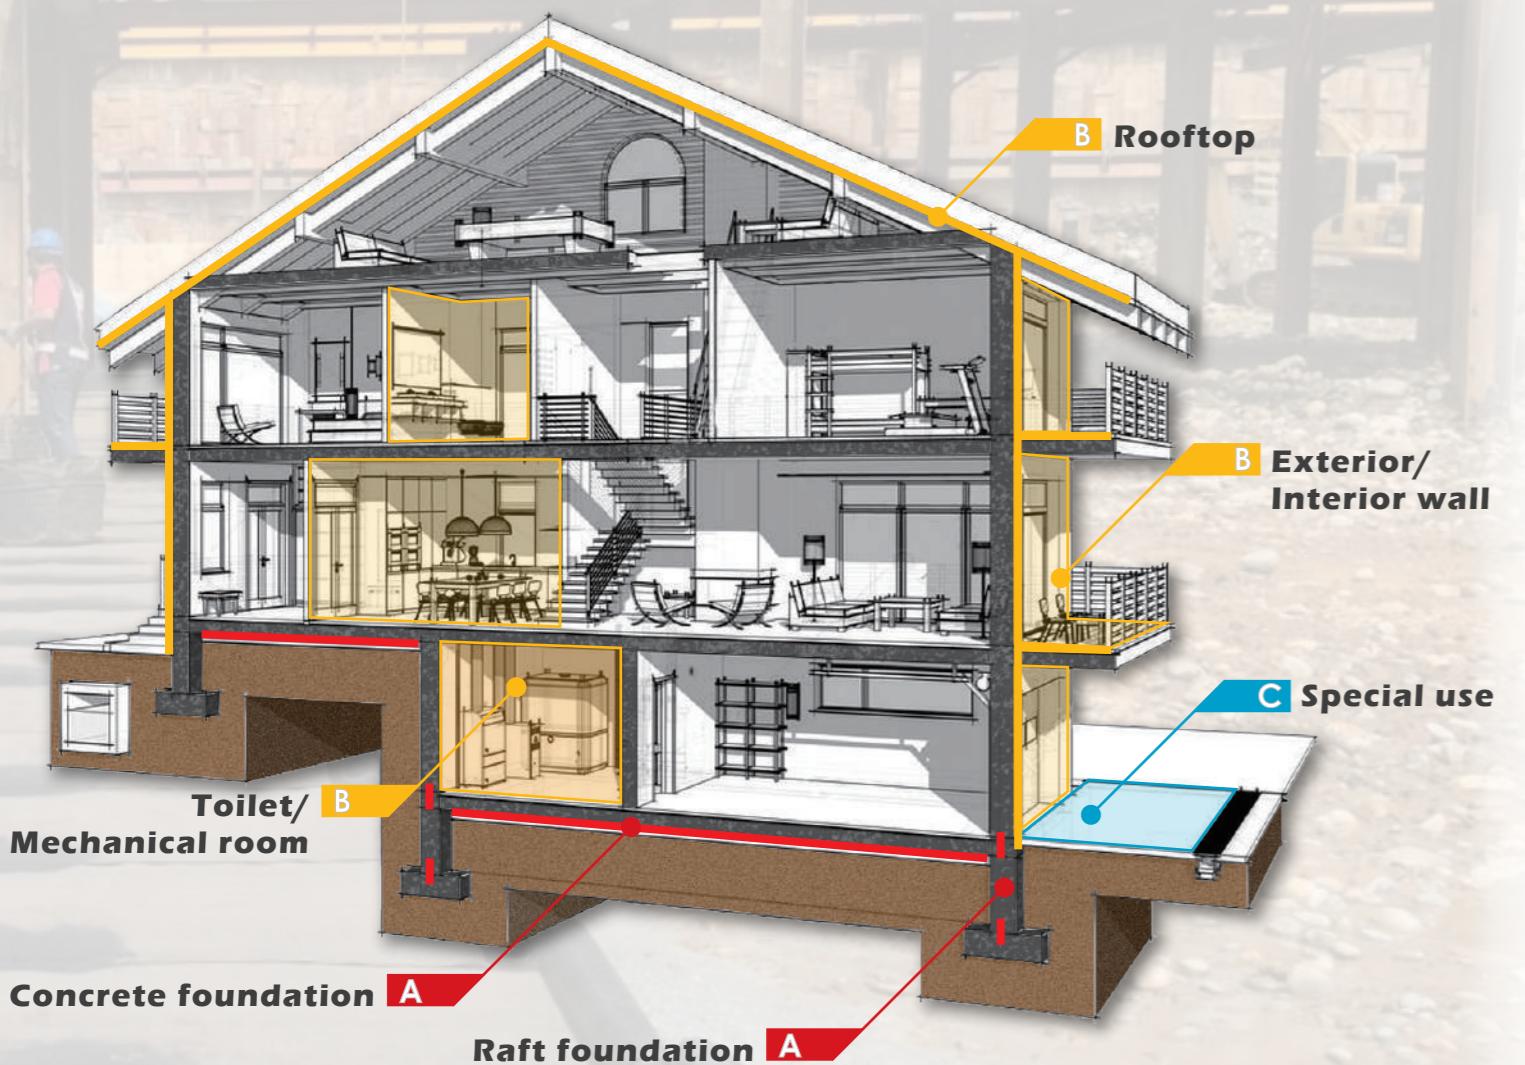

Flooring

Soundproofing

1 Waterproofing

Waterproofing plays a vital role in concrete projects. If the materials and compatibility are considered carefully, the best service performance can be guaranteed. Since the initial sales activity of chemical building materials, Aftek is improving products and knowledge relentlessly, in order to provide the most advanced system services to our customers.

A. Structure

- adimixure/ waterstop
- Concrete foundation
- Raft foundation/ Tank
- Steel deck

B. Surface

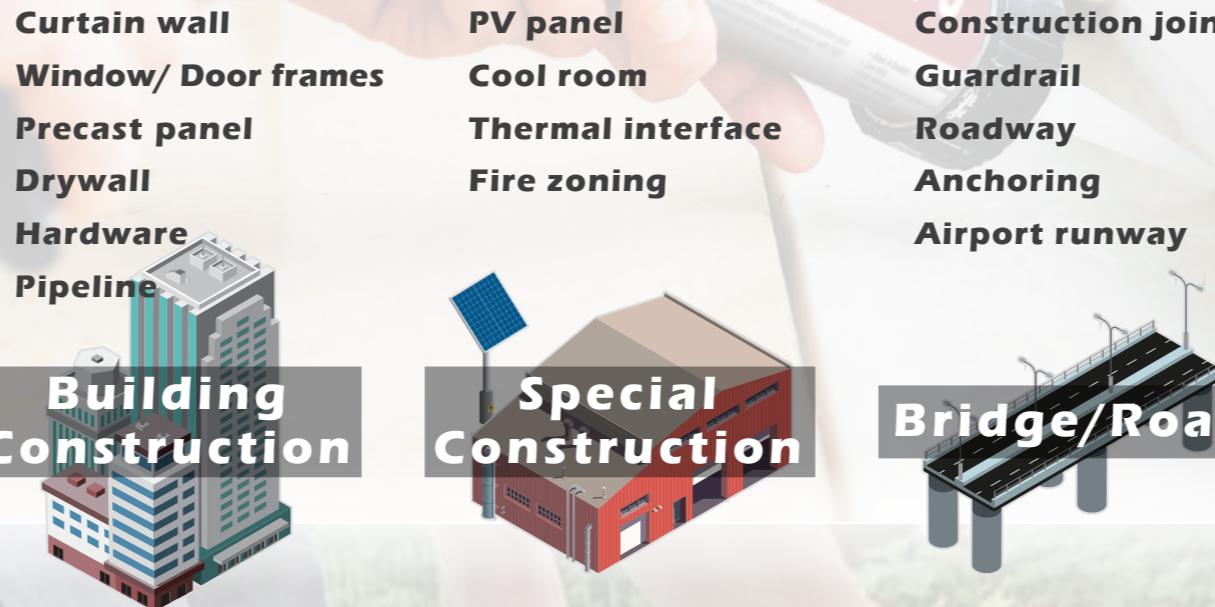

- liquid & sheet membrane
- Exterior/ Interior wall
- Balcony/ Terrance
- Bathroom/ Toilet
- Roof

C. Special use

- anti-root/ polyurea
- Concrete planter
- Pavement
- Pool

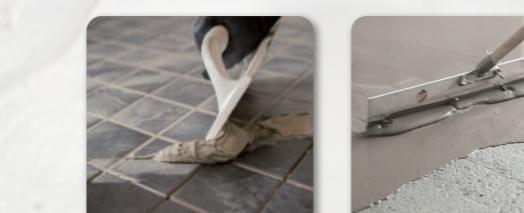

2 Sealant & Adhesive

Aftek sealants can be divided into two categories of application: construction or civil engineering project. Features such as weather resistance, mechanical strengths and durability are to be considered based on project needs. In response to the booming wellness market, most adhesive products are available in water-based, low-VOC versions.

3 REDI-MIX Grout & Mortar

The REDI-MIX products are all prepared in factory for precise proportions, in order to help decrease on-site mixing mistakes as possible, and also improve workability. The series covers a wide range of application, including structural repairing and grouting products.

4 Flooring

Aftek flooring system, includes primer, mid-coat and top-coat made of different chemical bases, is developed to meet various application needs. In addition to provide products with high quality, we also offer on-site technical support, in order to help our customers to choose the most suitable products according to the site conditions.

5 Others

(inc. insulation, texture finishes..etc.)

- Functional stucco
- Peelable protective coating
- Envelope thermal insulation
- Wall texture finishes
- Soundproof flooring
- Anti-corrosion coating
- Steelwork fire protection (sprayed mortar/ coating)
